DekTec – Professional Broadcast & Media Solutions

DekTec is a leading provider of high-quality **broadcast, media, and digital video technology solutions**. Its product portfolio includes **PCIe cards, USB devices, IP/SDI interfaces, modulators, analyzers, and signal processing solutions** for professional broadcasting and media workflows.

DekTec solutions support **SDI, SMPTE ST 2110, DVB, ATSC, IP video, and other industry standards**, making them suitable for **broadcasting, OTT, IPTV, satellite, cable, testing, monitoring, and media production**.

Key Highlights:

- Professional SDI & IP video solutions
- SMPTE ST 2110 & next-generation broadcast support
- DVB, ATSC and RF solutions
- Signal generation, analysis & monitoring
- PCIe and USB-based interfaces
- Solutions for broadcasters, system integrators & test facilities

INTINOR
WE ARE DIREKT

Intinor – Reliable Live Video Transport Solutions

Intinor provides professional **live video transport and contribution solutions** for broadcasters, sports, events, and media organizations. Its **Direct Router** platform enables reliable, high-quality video transmission over IP networks, supporting efficient remote production and live broadcasting workflows.

Key Highlights:

- Professional live video contribution & distribution
- Reliable IP-based video transport
- Supports remote production workflows
- Designed for broadcast, sports & live events
- High-quality, low-latency transmission

ADDER®

Adder – High Performance IP KVM Solutions

Adder Technology delivers advanced **IP KVM, Secure KVM, and KVM Matrix solutions** for broadcast, government, military, transport, and other mission-critical environments. Adder solutions enable users to securely access and manage multiple computers from a single workstation, improving **workflow efficiency, flexibility, ergonomics, and operational resilience**.

Key Highlights:

- High-performance IP KVM solutions
- Secure KVM for critical environments
- Flexible KVM Matrix connectivity
- Remote access to computers
- Ideal for broadcast, control rooms & mission-critical operations

SKAARHOJ

SKAARHOJ – Universal Broadcast Control Solutions

SKAARHOJ designs **state-of-the-art universal broadcast control panels** for professional live production. Its portfolio includes **camera shading RCPs, PTZ camera controllers, vision mixing panels, router controllers, replay surfaces, audio fader boards, and software solutions**.
SKAARHOJ's flexible hardware and software platform integrates seamlessly into modern broadcast workflows, providing **intuitive tactile control, customizable configurations, and efficient operation** for broadcasters and content creators.

Key Highlights:

- Universal broadcast control panels
- PTZ & robotic camera controllers
- Vision mixer & router control
- Replay and audio control surfaces
- Flexible hardware & software integration
- Designed for professional live production

Wowza – Reliable, Scalable Video Streaming Solutions

Wowza Media Systems provides **reliable and scalable video streaming solutions** that help businesses integrate live and on-demand video into their products and services. Its portfolio includes **Wowza Streaming Engine, Wowza Video Intelligence Framework, and Wowza Flowplayer OVP**, supporting cloud, on-premises, hybrid, and edge deployments.

Key Highlights:

- Professional video streaming solutions
- Live & on-demand video delivery
- Cloud, on-premises & hybrid support
- Developer-friendly APIs and tools
- Solutions for media, sports, events, surveillance & enterprises

Visit us at Hall 1. Booth D-49

Osprey Video – Professional Video Capture & Streaming Solutions

Osprey Video delivers **reliable video capture, encoding, decoding, and streaming solutions** for professional broadcast and mission-critical applications. Its portfolio includes **TALON encoders and decoders, RAPTOR PCIe capture cards, open Gear solutions, video converters, fiber extenders, and distribution products**.

Osprey solutions are designed for **low-latency performance, long product lifecycles, and reliable operation** across demanding environments such as broadcast, sports, medical, government, military, and enterprise applications.

Key Highlights:

- 4K video encoding & decoding
- SDI, HDMI & analog video capture
- PCIe capture cards up to 12G-SDI
- Open Gear infrastructure solutions
- Video converters & fiber extenders
- Low-latency, mission-critical performance
- Long-term product support and reliability

techex.

Techex – Software-Defined Live Broadcast Solutions

Techex is a specialist in **software-defined live video solutions**, combining broadcast expertise with IP and Cloud technologies. Since 1972, Techex has supported broadcasters and media companies with solutions for **live video transport, processing, monitoring, and distribution** across on-premises, cloud, and hybrid environments.

Its portfolio includes **tx darwin, tx edge, tx IPTV, and tx core**, designed to simplify complex live broadcast workflows while providing reliable, scalable, and flexible infrastructure.

Key Highlights:

- Software-defined live broadcast solutions
- IP & Cloud-based workflows
- Live video transport and processing
- Cloud, on-premises & hybrid deployment
- Reliable solutions for Tier-1 broadcasters

Zentag AI – AI-Powered Sports Video Automation

Zentag AI delivers **AI-powered video automation solutions for sports broadcasters, OTT platforms, leagues, and media organizations**. Its platform analyzes live and recorded sports footage to automatically identify key moments and create professional-quality highlights in real time.

Key Highlights:

- AI-powered sports highlights generation
- Real-time detection of key match moments
- **AI Reframe** for multi-platform video formats
- **Smart Live Recap** for live-stream catch-up
- **Archive Media Management** for organized video libraries
- Supports **50+ sports**, including cricket, football, basketball, and tennis
- Seamless integration with existing broadcast and OTT workflows

x-dream-media – Media-IT Software & Integration Solutions

x-dream-media is a specialist **software manufacturer and integrator for the media industry**, helping broadcasters, post-production facilities, telecom operators, and enterprises design and implement efficient media-IT workflows. Its expertise covers **software integration, workflow automation, custom development, deployment, training, and support**.

Its portfolio includes **x-dream-Fabrik, Media Suite, and Broadcast Suite**, supporting applications such as media processing, ingest, transcoding, broadcasting, content management, and workflow orchestration.

Key Highlights:

- Media-IT software & integration
- Broadcast and post-production workflows
- Ingest, transcoding & media processing
- Workflow automation & software integration
- Custom development & deployment
- Consulting, training & technical support
- Solutions for broadcasters, OTT/VOD & media organizations

SIGNIANT®

Signiant – Fast & Secure File Transfer Solutions

Signiant provides **high-speed, secure, and reliable file transfer solutions** designed for media and entertainment organizations. Its SaaS-based platform enables teams to efficiently move large media files between people, systems, partners, and cloud storage. Signiant's portfolio includes **Media Shuttle, Jet, Flight Deck, Media Engine, and Signiant Verify**, supporting workflows such as content exchange, automated file movement, cloud I/O, media management, and content validation.

Key Highlights:

- Fast & secure large-file transfers
- Transfer speeds up to **100× faster** than standard methods
- Cloud, on-premises & hybrid storage support
- Automated system-to-system file movement
- Media management and content validation

BBright
HEXAGLOBE GROUP

BBright – Advanced Live Video Solutions

BBright is a leading provider of **media processing, video transport, playout, and monitoring solutions** for the professional broadcast industry. Its technology helps broadcasters, service providers, and content owners transport, process, and monitor high-quality live streams with reliability and flexibility.

BBright’s portfolio includes **Transport over IP, Ingest & Playout, and Monitoring solutions**, supporting modern workflows such as **SMPTE ST 2110, SDI, SRT, RIST, UHD, HDR, and immersive audio**.

Key Highlights:

- Live video transport & processing
- ST 2110 & IP-based workflows
- UHD & HDR support
- Ingest and next-generation playout
- Real-time broadcast monitoring
- Encoder, decoder & IP Gateway solutions
- Designed for reliable 24/7 broadcast operations

woody
TECHNOLOGIES

AI-Powered Media Discovery & Workflow Automation

Woody Technologies develops intelligent solutions that simplify **media ingest, content discovery, and broadcast workflow automation**. Its latest **Woody Vision** platform uses AI to search, verify, and analyze user-generated content across major social platforms such as YouTube, X, TikTok, and Instagram.
Woody Vision enables broadcasters and newsrooms to discover relevant content using **natural-language search, AI-powered analysis, visual content tracking, location intelligence, and real-time monitoring**, helping teams find and act on breaking stories faster.

Key Highlights:

- AI-powered multi-platform social search
- Search across YouTube, X, TikTok & Instagram
- Automated narrative & visual analysis
- Real-time location intelligence
- Custom alerts and trend monitoring
- Designed for broadcasters, journalists & media teams

CAPELLA
Designed to evolve

Capella Systems – Enterprise Video Processing Solutions

Capella Systems develops **high-performance video transcoding and live encoding software** for modern media workflows. Its solutions can be deployed **on-premises, in the cloud, or in**

hybrid environments, giving broadcasters and media teams flexibility, scalability, and control over their video operations.
Its **Cambria** product family supports VOD transcoding, live encoding, cloud workflows, AI-powered video processing, and advanced media operations.

Key Highlights:

- High-performance video transcoding
- Live encoding for broadcast & streaming
- On-premise, cloud & hybrid deployment
- GPU-accelerated processing
- AI-powered video analysis
- Scalable and flexible media workflows
- Solutions designed for reliable, efficient video operations

IHSE – Advanced KVM Solutions

IHSE is a leading developer and manufacturer of **advanced KVM (Keyboard, Video, Mouse) solutions** for mission-critical environments. With decades of experience and German engineering, IHSE provides **KVM extenders, matrix switches, IP KVM solutions, converters, and high-resolution signal management** for secure and efficient workflows.
IHSE solutions are widely used in **broadcast and post-production, government and defense, healthcare, banking, air traffic control, maritime, esports, and control-room applications**. Its modular and scalable systems support flexible configurations and future upgrades, including high-resolution video, SDI and USB 3.0.

Key Highlights:

- Advanced KVM Extenders & Matrix Switches
- Secure IP KVM Solutions
- Support for high-resolution video up to 8K

- SDI, USB and multiple video interfaces
- Modular & scalable architecture
- Designed for 24/7 mission-critical operations
